SURAJ NARAYAN GUPTA

Data Analyst | SQL · Power BI · Python | AI-Enabled Analytics

Delhi, India | +91-9891081354 | surajnarayangupta2004@gmail.com | linkedin.com/in/codeguptaji | github.com/Codeguptaji-0 | credly.com/users/codeguptaji

PROFESSIONAL SUMMARY

Data Analyst with 2+ years of freelance experience delivering 15+ dashboards and reports in Excel, Power BI and Looker for small businesses. HackerRank-certified in SQL (Intermediate). Founder of Sparkwaves Production, where I built EduManage, a school management SaaS, and school-market analytics. Building applied AI skills (RAG, NL2SQL, LLM agents) to turn analytics into automated insights.

TECHNICAL SKILLS

Analytics & BI: SQL (PostgreSQL, MySQL, SQLite), Advanced Excel, Power BI (DAX), Google Looker, EDA, Matplotlib

Python & Data: Pandas, NumPy, Scikit-learn, Data Cleaning & Validation, ETL (CSV, Excel, REST APIs), SQLAlchemy, Star Schema Modeling

AI & Automation: NL2SQL, RAG & Vector Search, LLM-based Insight Generation, Vertex AI / Gemini, APScheduler

Tools & Cloud: Git, GitHub Actions (CI/CD), Docker, FastAPI, Google Cloud (BigQuery, Cloud SQL), AWS (Basic)

EXPERIENCE

Founder & CEO | Sparkwaves Production (Udyam-registered MSME), Delhi | 01/2026 – Present

- Built EduManage, a multi-role school management SaaS (principal, teacher and parent views) on a PostgreSQL backend with Google Sheets sync; delivered a client-tested prototype.
- Prepared a full commercial package for a client, covering source-licence and IP-transfer pricing with milestone-based payments.
- Ran school-market data pulls with Apify: about 200 school records across Delhi, Southeast Asia and Mumbai/Bangkok, cleaned and delivered as formatted Excel files for sales outreach.
- Operate an AI agent that posts daily on LinkedIn, and am designing agent workflows for lead generation with a human-approval step; completed Udyam and GeM seller registration.

Freelance Data Analyst & Developer | Self-Employed, Delhi | 2023 – Present

- Delivered 15+ dashboards and analytical reports (Excel, Power BI, Looker) for small-business clients, supporting data-driven decisions.
- Cleaned, transformed and analyzed datasets of 10,000–100,000 rows across the full data lifecycle to extract actionable insights.
- Automated recurring reporting with Excel formulas and Python scripts, reducing manual reporting effort.
- Worked directly with clients to turn ambiguous requirements into end-to-end data solutions.

PROJECTS

EduManage School Analytics Dashboard | Power BI, DAX, SQL, Python | *Synthetic dataset (1,183 students, 4,732 fee transactions)* | GitHub

- Modeled a 5-table star schema and wrote 10 SQL analysis queries and DAX measures for 10 school KPIs, including 94.63% fee collection efficiency and 86.9% average attendance.
- Built 3 dashboard views with 5 written insights: Classes 9–12 causing 42% of late payments, January attendance dip to 83.8%, and 8 'dual at-risk' students (attendance <75% with overdue fees).

School Market Analysis & B2B Lead Scoring | Python, Pandas, Excel | *Simulated dataset of 240 schools (Delhi NCR, Southeast Asia)* | GitHub

- Cleaned and standardized school records (cities, boards, fee brackets) and built a 100-point lead score (capacity, fee tier, digital maturity, ERP need) that sorted leads into 3 priority tiers.
- Delivered a multi-tab Excel model with city and board summaries plus an outreach strategy memo for the EduManage go-to-market.

Customer Churn: Business Case & ROI | Python, Scikit-learn, Excel | *Simulated portfolio of 5,000 accounts* | GitHub

- Turned a churn model into a cost-benefit case comparing no action, blanket outreach and risk-targeted outreach; top 2 risk deciles captured 77.3% of churners, with 4.85x lift in top decile.

- Targeting 1,000 accounts instead of all 5,000 cut campaign spend by 80% (■29.97 lakh vs ■1.5 crore); wrote a one-page decision memo for leadership.

EduManage AI Risk Engine | Python, XGBoost, SHAP, FastAPI | *Synthetic data (1,183 students)* | Live demo | GitHub

- Built fee-defaulter and dropout risk models on 30 features engineered from the star schema, benchmarked against Logistic Regression and Random Forest baselines.
- Added SHAP top-3 risk drivers per student, a FastAPI service (prediction endpoints and student risk profile) and a web dashboard for counselors.

Agentic BI Assistant | Python, FastAPI, SQLite, TF-IDF retrieval, Chart.js | *EduManage synthetic data* | Live demo | GitHub

- Built an assistant routing questions to text-to-SQL (self-correcting schema retry loop) or TF-IDF retrieval over project memos; auto-generates Chart.js visualizations.
- Wrote a 35-question benchmark suite with automated runner tracking pass rate and latency; served via FastAPI chat endpoint and web UI.

Retail Sales Analytics Dashboard | SQL, Star Schema, DAX, Chart.js | 10,500+ records

- Processed 10,500+ transactional records through Pandas ETL into SQLite star schema; engineered 15+ DAX measures and SQL window queries (LAG, RANK, RFM segmentation).

Additional Projects: Customer Churn Prediction System (FastAPI, 0.76 ROC-AUC), Automated Business Data Pipeline (52,000+ records, APScheduler), Smart Financial Forecasting Platform (Isolation Forest, Docker) and Multi-Tenant Analytics SaaS (JWT, RBAC, CI/CD). Details on GitHub.

CERTIFICATIONS

SQL (Intermediate) | HackerRank | Jun 2026 | Verified: hackerrank.com/certificates/1d57a1beb35c

Google Cloud Skills Boost: 16 skill badges (BigQuery Connected Sheets, Looker, Cloud SQL for PostgreSQL, Vertex AI, Gemini, Multimodal RAG) | 2025 | credly.com/users/codeguptaji

AI Skills Passport | EY and Microsoft | Verified: gsp.ey.com

EDUCATION

Bachelor of Computer Applications (BCA) | IGNOU | Pursuing

Diploma in Data Science and Analytics | DICS Institute | Completed 2026

Class XII (CBSE) | Govt. Boys Sr. Sec. School No. 1, Delhi | 2023

Class X (CBSE) | Govt. Boys Sr. Sec. School No. 2, Delhi | 2021

ACHIEVEMENTS

- Participant, UIDAI Data Hackathon 2026
- Team SkillSetu, Smart India Hackathon 2026 (competency gap detection engine for IGNOU)
